"Hello my fellow Patriots—been diving into ivermectin lately, and wow, it's truly amazing! This drug snagged the 2015 Nobel Prize for smashing tropical diseases like river blindness—billions of doses later, it's a legend. I've been following Dr. Makis' posts on X about using it for cancer and even psoriasis. What hooked me? It blocks sugar uptake—starving out bad cells—and has serious anti-inflammatory chops. Took it with fenbendazole, and my 15-year psoriasis redness is gone in 30 days with some few minor ashy spots. No deep science here, just sharing what worked. Thank you Doctor @MakisMD for all you do.

CASE 02:

CASE 03:

Residual of taking your protocol. Cleared my scalp psoriasis. Yahoo/06 - TES... ☆

 **From:** [Redacted] Sat, Jan 18 at 2:00 p.m. ☆
To: William Makis

Hi Dr. Makis,

I found that my scalp psoriasis cleared up after taking your oral protocol within a couple of weeks. This ailment I have had for over 30 years. I am only mentioning it now as I just watched your last video to WCH Florida. Thought you might like to know this. After my stay in hospital I am getting my weight and strength back and feeling better with all the supplements.

Take care,
[Redacted]

CASE 04:

Patriotgrandma @Sharkwife3 · Feb 12

I e been taking **ivermectin** for almost a month. A tooth I thought would need a root canal doesn't. **Psoriasis is gone**. Clear skin. Stomach pain on left side. Gone.

William Makis MD ✓ @MakisMD · Feb 12

Ivermectin and Fenbendazole can bring significant relief in Rheumatoid Arthritis as well as Osteoarthritis!

I have several testimonials already and more people willing to try every day 😊 ...

Felix 🌻🌱 @whosdaughter · Jan 21

Update on **ivermectin** for **psoriasis**, used 4 days topically. My inflammation has gone down, not itchy, and huge visible difference. I have photos but it's on my scalp and I'm embarrassed 🙈 but I will send photos of before and after 4 days in dm if someone wants to see.

Replying to @stella_immanuel

I never had Covid, but last month I had an attack of gout. Took **Ivermectin**, and by day 3 it had resolved. No recurrence at all. I have psoriatic arthritis, and I noticed that my mild **psoriasis** cleared up after the course of **Ivermectin** too!

Well I took Iver to show my Dad that I wouldn't die from it lol 😁, to get him on board with his cancer journey.

I have had eczema for well over 40 years. For the last year I had it so bad on the palm of my hand. Not thinking anything of it, because I could not get it cleared up for the life of me, I kept taking the Iver and after two weeks, my hands completely resolved of it 😊 I have never seen this in my life, always using a steroid cream to basically just give temporary relief

So while I was taking it to show I wouldn't die for my Dad, I have completely inadvertently resolved my own issues. Shocked has been an understatement! I did go off for a couple of weeks and it did seem to
